

# Medicine Without Doctors: Reimagining Care and Voice through Play

Dr Ingrid Young and Dr Nayha Sethi, Usher Institute, University of Edinburgh  
 Dr Lukas Engelmann, Dr Catherine Montgomery, Social and Political Science, University of Edinburgh  
 Dr Agomoni Ganguli-Mitra, School of Law, University of Edinburgh  
 Will Nutland, The Love Tank  
 Santini Basra, And Then

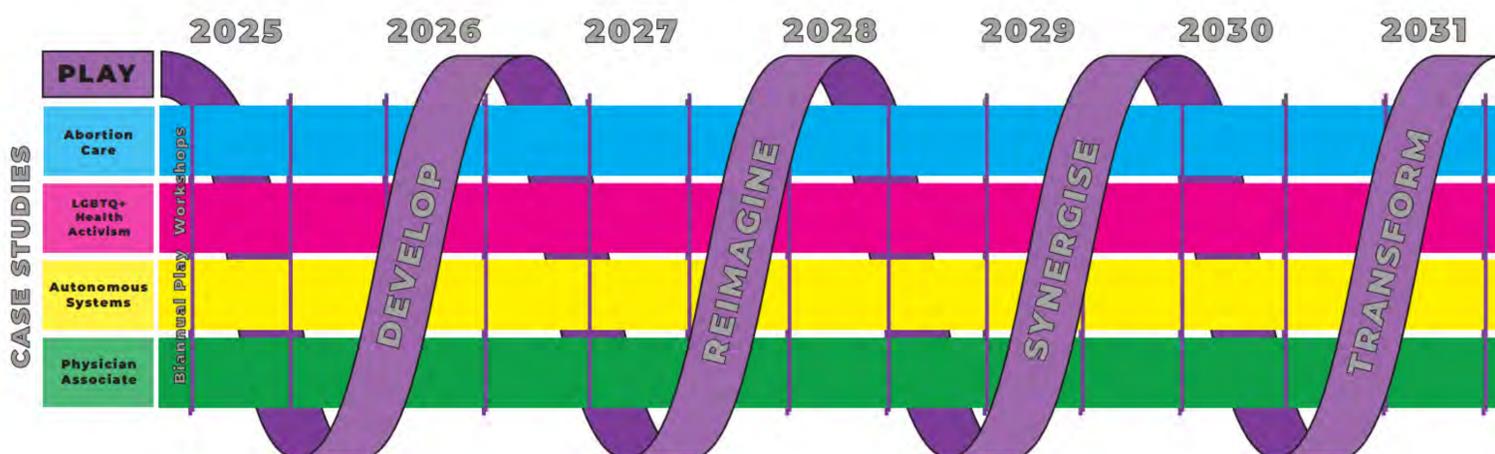

Medicine without doctors is now a possible and plausible future for healthcare. New technologies, patient activism, and economic upheaval draw power traditionally held by doctors. This project reimagines the future of care, exploring whose voices are heard and whose knowledge is valued.

## The Future of Care and Voice in Medicine

Four case-studies will investigate whose authority, needs and values emerge when the doctor is de-centred, and which are neglected and lost.

### MEDICINE WITHOUT DOCTORS REIMAGINING CARE AND VOICE THROUGH PLAY TIMELINE

Using engagement methods anchored in speculative tools of play, we combine perspectives from history, law, ethics, sociology, and Science Technology Studies (STS).

### Why Play?

- To bridge disciplinary silos
- To engage creatively with stakeholders
- To imagine alternative futures
- To build and shape a positive research culture

### How will we play?

#### Training in Play

Training in creative methods led by professional designers

#### Design Jams

Focused, highly collaborative challenge sessions for workstreams

#### Programme Workshops

For collaboration, interdisciplinarity & inventive problem-making

#### Medical Playground Residencies

Opening up new and material ways of examining medicine
